Bolgatty

Project: **BioAnnotation Tool**

Role: Full Stack Developer

Status: Ongoing

Overview: Developing a browser extension designed for bioannotation, providing researchers and professionals with advanced tools for annotating biomedical data. The tool supports both automatic and manual Named Entity Recognition (NER) and relationship extraction, with a focus on ontology configurability and storage capabilities.

Key Features:

- **Automatic & Manual NER:** Enables recognition and extraction of named entities in biomedical data, offering options for automation and manual adjustments.
- **Relationship Extraction:** Facilitates identification and linking of relationships between entities.
- **Ontology Configuration & Linking:** Provides users with the ability to configure and integrate external ontologies, ensuring flexibility and precision.
- **Storage:** Supports saving annotations for further analysis, with options for drafts and submission workflows.

Tech Stack:

- Frontend: JavaScript, Vue.js
- Backend: Laravel
- Database: MySQL

Software Engineer

07/2023 – 09/2024

Bolgatty

Project: **Skillsense**

• Role: Full Stack Developer

• Duration: 1 year

Overview:

Developed and maintained a comprehensive recruiting web application designed to streamline the hiring process. This product aims to connect employers with potential candidates efficiently and effectively.

Responsibilities:

- Designed and implemented backend APIs using PHP Laravel to ensure robust and secure data handling.
- Developed and integrated frontend components using AngularJS to provide a seamless user experience.
- Collaborated with cross-functional teams to define, design, and ship new features.
- Conducted code reviews and optimized application performance.
- Ensured the application met the highest standards of security and scalability.

Tech Stack:

- Backend: PHP Laravel
- Frontend: Angular
- Database: Mysql

Project: **Skillsense Candidate Login**

Role: Full Stack Developer

Duration: 2 Months

Overview:

Developed and managed a comprehensive job portal web application aimed at facilitating job seekers and employers in the recruitment process. This application offers various features to enhance the hiring experience and ensure seamless interaction between users.

Responsibilities:

- Designed and implemented backend systems using PHP Laravel to handle user data, job postings, and application tracking.
- Developed and integrated frontend components using Angular to provide a dynamic and responsive user interface.
- Implemented key features such as resume upload, job recommendations, job application processes, and hire flow status tracking.
- Collaborated with team members to ensure all features met user requirements and adhered to best practices.
- Conducted thorough testing and debugging to maintain a high-quality application.

Features:

- **Resume Upload:** Enabled users to upload and manage their resumes.
- **Recommended Jobs:** Provided personalized job recommendations based on user profiles.
- **Job Apply:** Simplified the job application process for users.
- **Hire Flow Status:** Allowed users to track their application progress through various stages of hiring.

Tech Stack:

Backend: PHP Laravel

Frontend: Angular

Database: Mysql

Project: **Super League Kerala**

Role: Full Stack Developer

Duration: 3 Months

Overview: Developed and maintained a comprehensive web application for a football league, providing real-time updates and detailed insights into matches, players, and clubs. The platform ensures seamless interaction for fans, players, and administrators with a dedicated admin panel for effective management.

Responsibilities:

- Backend Development:
- Frontend Development:
- Admin Panel:
- Real-Time Functionality:
- Collaboration and Testing:

Features:

- **Live Scores:** Displayed real-time match scores, timelines, and key game events.
- **Player Status:** Showcased detailed player profiles, including statistics and performance updates.
- **Club Management:** Provided comprehensive information about clubs, including rankings, schedules, and results.
- **Admin Panel:** Allowed administrators to:
- **Interactive Dashboard:** Enabled efficient data management and match updates.

Tech Stack:

- Backend: PHP Laravel
- Frontend: Angular
- Database: MySQL

PHP INTERN

03/2023 – 05/2023 | Varanasi

A Better Logic 

- Technology used: **Laravel, Php, HTML, CSS, Bootstrap, Wordpress.**
- Working with team on creating a new feature and services to optimized of a live project.
- During the internship, I worked in **Laravel framework** of **Php** to developed the user **interface of a website.**

SKILLS

C++ | HTML | CSS | PHP | Bootstrap | SQL | Laravel | Javascript | TailwindCss | AngularJS | JQuery

CERTIFICATION

WEB DEVELOPMENT TRAINEE

01/2023 – 03/2023

Internshala

- Tools:- **VS-Code, MySQL-Workbench, GitHub, XAMPP.**
- During my training as a web developer, I gained experience in using various technologies such as HTML, CSS, JavaScript, Bootstrap, and SQL. I learned how to design and develop responsive websites, create interactive user interfaces using JavaScript, and manage data using SQL.
- This training equipped me with the necessary skills to develop web applications and create engaging user experiences.
